Youth Treatment Services Continuum of Care

MISSION STATEMENT

Youth services will be provided in a culturally relevant environment and in a culturally sensitive manner, which respects the diversity of the targeted population. Youth treatment services will:

- Be responsive to low-income, indigent youth and families who are in need of a community-based continuum of care.
- Be provided in a manner which reduces barriers and increases access, engagement, retention, and completion.
- Foster collaboration and community responsiveness at all levels of care, with other state agencies, including the Division of Children and Family Services (DCFS), Juvenile Rehabilitation Administration (JRA), and Regional Support Networks (RSNs).
- Be coordinated to reduce eligibility, financial, and clinical barriers to treatment resources.
- Ensure that family members and other significant adults in the lives of the youth we serve are welcomed, encouraged, and assisted in participating in the treatment, no matter how difficult or complicated the issues faced by the family.

Introduction

This is a resource guide to youth treatment services contracted by the Department of Social and Health Services (DSHS) - Division of Behavioral Health and Recovery (DBHR). The guide will clarify terms and definitions and provide instructions to refer youth to outpatient or residential treatment services.

The goals of DBHR-contracted youth chemical dependency treatment are to provide each adolescent and his/her family with a structured, age-appropriate program, which includes, but is not limited to:

- a. Abstinence from alcohol and other drugs.
- b. Ancillary treatment services to family members, which may include birth, adoptive, foster parents, and other caring adults and youth.
- c. Comprehensive assessment of the youth's drug and alcohol use, his/her family and other support systems, school involvement, and other high risk behavior, including suicide risk, HIV/AIDS Brief Risk Assessment, etc.
- d. An assessment of adolescent development, including level of maturation, emotional stability and functioning, educational history, and learning ability.

Treatment should be provided which respects and addresses the age, gender, language, culture, ethnicity, and sexual orientation of participants and their family members.

DEFINITION AND REQUIREMENTS OF TREATMENT SERVICES

DBHR Certification: Certification is approval of a chemical dependency treatment program by DBHR. Certification of a program signifies that the program meets certain minimum standards as outlined in Washington Administrative Code (WAC) 388-805 includes a number of important references to youth counselors, outpatient and residential treatment, and treatment in schools.

Youth Contract Requirements: State certified outpatient and residential treatment programs have, as part of their contracts, specific guidelines for the treatment of youth, including specific assessment and counseling requirements, staffing ratios, reporting and referral requirements, etc. For specific information regarding these contract requirements, contact your County Alcohol and Drug

Coordinator, DBHR Regional Administrator, or the DBHR Youth Treatment Services Manager, Tina Burrell, at (360) 725-3707.

Assessment: A thorough, multidimensional, individualized interview performed by a chemical dependency professional (CDP) to determine appropriateness for adolescent chemical dependency treatment. Either outpatient or residential treatment providers may conduct assessments. Often, agencies may use a standardized, adolescent-specific chemical dependency assessment tool, such as the Personal Experience Inventory (PEI), or the Client Substance Abuse Index (CSI), or Global Assessment of Individual Need (GAIN) or other appropriate tools.

In compliance with Revised Code of Washington (RCW) 70.155.080 youth are prohibited from possessing tobacco products while participating in treatment services.

DBHR has developed a useful **Youth Assessment/Diagnosis** tool that meets all WAC, American Society of Addiction Medicine (ASAM), and Diagnostic Statistical Manual (DSM) IV requirements. Contact Ruth Leonard at (360) 725-3742 for copies.

An assessment should include:

- a. An alcohol and drug use history.
- b. A family use pattern and addiction history.
- c. A description and assessment of existing support systems, including family and peer relationships and school involvement, and an assessment of high risk behaviors, including suicide risk evaluation and an HIV/AIDS Brief Risk Evaluation.
- d. An assessment of adolescent development, including level of maturation, emotional stability and functioning, educational history, and learning ability.

ADOLESCENT OUTPATIENT SERVICES

A. Outpatient Treatment

A state certified non-residential program, which provides chemical dependency assessments and an alcohol/drug-free counseling program for adolescents and young adults ages ten (10) through 17. Young adults ages 18 -20 may be served in youth agencies if appropriate. Collateral and family support services may also be provided to family members of youth clients. Clients under the age of ten (10) may be served with the approval of the DBHR contract manager. Outpatient treatment programs for adolescents are designed to diagnose, stabilize, counsel, and build family and social support systems, which promote abstinence and growth. Youth outpatient services shall include treatment appropriate for misuse of alcohol and other drugs, in addition to treatment for addiction.

DBHR-funded youth outpatient services are funded through counties. A list of all these programs is located on **pages 13 - 20** of this booklet.

B. Outreach Services (contracted services with certified agencies)

Defined as initiating discussion with youth regarding alcohol and other drugs, possible consequences of usage, and education and information about services and resources for individuals affected by their own substance abuse or chemical dependency, or by that of significant people in their lives. Youth outreach services may include outreach to youth in schools, Division of Children and Family Services (DCFS), Juvenile Rehabilitation Administration (JRA), Juvenile Courts, or referred by agencies or individuals concerned about children.

C. Group Care Enhancement Program

DBHR funds a number of counties which contract with adolescent alcohol and drug treatment agencies to outstation certified counselors in residential agencies serving youth who are placed by the child welfare, juvenile justice, and mental health systems. The goals of the program are to deliver chemical dependency treatment and prevention services at facilities already housing youth and to integrate those services in the overall treatment culture of each facility.

The counselors provide a mix of services that vary by facility. A menu of alcohol and drug services covered includes assessment, individual and group treatment, Alcohol, Tobacco and Other Drugs (ATOD) prevention/education, in-service training for residential staff, and case consultation. The service is available in a number of youth serving facilities throughout the state.

For information about the Group Care Enhancement Services, contact Ella Hanks at 509.225.6196.

DESCRIPTIONS OF ADOLESCENT DETOX AND RESIDENTIAL TREATMENT SERVICES

A DBHR certified and state licensed residential facility, which is voluntary, alcohol and drug-free, designed for youth, and supports abstinence from alcohol and other drugs. Family and significant other treatment is included, as well as relapse and long-term recovery education and counseling. Individual programs may provide, depending upon the level of care (outlined in this section), more intensive therapeutic interventions and services. Some residential facilities treating youth may be a part of a program, which also treats adults. DBHR-contracted youth providers must comply with safeguards for the treatment of youth, which include separate and distinct sleeping room assignments, and specific developmentally appropriate programming.

The county contracted youth providers may conduct assessments to determine clinical eligibility for residential services, by DBHR-funded residential facilities. The treatment descriptions listed in this section are meant to be brief overviews.

For more details on levels of care, contact the DBHR Youth Services Lead, Tina Burrell at (360) 725-3796. DBHR-funded **residential, detox, and treatment services** are funded directly from DBHR to individual providers. A list of these providers is located in the DBHR Directory of Chemical Dependency Treatment Services in Washington State – DBHR’s “Greenbook.”

<http://www1.dshs.wa.gov/DBHR/services/certification/GB.shtml>

Financial assistance is available to those youth and families who qualify for residential treatment for the reimbursement of mileage and lodging associated with attendance at a DBHR-funded residential facility. See section on **Transportation Assistance/Family Hardship Program** on **Page 11** of this booklet.

Taking into consideration the results of an assessment using ASAM makes determination of the need for inpatient treatment. The assessment process would include information regarding the safety of the minor, the likelihood of deterioration of the minors’ recovery if released and information received from collateral sources such as the parents, the patients’ referral, probation, school, etc.

A. Youth Detoxification/Crisis Stabilization Services

The purpose of the Detoxification and Crisis Stabilization Services for youth is to provide a safe, temporary, protective environment for at-risk/runaway youth who are experiencing harmful effects of intoxication and/or withdrawal from alcohol and other drugs, in conjunction with emotional and behavioral crisis, including co-existing or undetermined mental health symptomatology. The Detoxification/Crisis Stabilization service will address the needs of and

treatment outcomes for youth who need chemical dependency and other treatment services but who may not be able to access these services due to acute intoxication and medical, psychological, and behavioral problems associated with their alcohol/drug use. Detox services are considered residential treatment. See Age of Consent Section.

Detoxification/Crisis Stabilization Services are available to youth, ages 13 - 17, which are:

1. Experiencing harmful intoxication substance-induced disorders and/or withdrawal from alcohol/other drugs.
2. Experiencing an episode of clear and present danger to harm self/others due to alcohol/drug intoxication and/or withdrawal, with associated emotional and behavioral problems.
3. Experiencing co-existing or undetermined mental health symptomatology, which need detoxification in order to make accurate assessment of treatment needs.

Youth under the age 13 or over age 17 may be served, based on clinical need and availability of age-appropriate services.

B. *Level I Youth Basic Residential Treatment*

Youth appropriate for this level of care include: Those ages 13 through 17 who evidence cognitive development of at least 11 years of age, have a primary diagnosis of chemical dependency, and require less clinical supervision and behavior management. A chemical dependency professional (CDP) will conduct a clinical assessment to participants, age 12 and younger, or age 18, 19, or 20, to determine their appropriateness for youth treatment. In some cases, referral of an 18 year old to adult Alcoholism and Drug Addiction Treatment and Support Act (ADATSA) services may be appropriate.

Generally speaking, youth participants in Level I will not necessarily require intensive therapeutic intervention for other disorders, such as mental disorders or aggressive behavior, as part of primary chemical dependency treatment.

Length of stay is variable, based on clinical needs and program design. Maximum stay is 60 days, with exceptions for longer stays if clinically indicated.

Level I programs may admit youth that meet some of the clinical characteristics of a Level II-type client, if the decision is based on clinical assessment and program ability to meet the needs of the youth and their family.

C. *Level II Youth Intensive Residential Treatment*

Youth appropriate for this level of care include: Those ages 13 through 17 who meet the criteria for being both chemically dependent **and** with the symptoms of a mental health diagnosis (or potential diagnosis) requiring concurrent management with the treatment of addiction (e.g., attention deficit-hyperactivity disorder, depression, conduct disorder, etc.) and/or extreme family dysfunction, prior trauma due to emotional, physical, and/or sexual abuse, which may present a major risk of danger to the client and/or others, and high risk to not complete treatment. Participant's age 12 and younger, or ages 18, 19, or 20 may be served with clinical assessment of appropriateness for youth treatment.

Length of stay is variable, but usually will be longer than Level I treatment. Maximum stay may extend to 120 days (expected range is 45 to 90 days). Exceptions to length of stay guidelines may be available with clinical need. Level II programs are required to provide chemical dependency counseling staff trained in areas other than chemical dependency, such as developmental issues, abuse, anger, aggression, and behavior management. They are also required to provide a mental health specialist position, and some form of staff and/or physical security for youth who are at risk to leave treatment against clinical advice. Some Level II programs are locked or are secure facilities. Youth with serious criminal history, history of assaultive behavior, sexual assault, murder, or attempted murder may be refused admission to treatment, but only upon reviewed by DBHR youth program managers.

Level II programs may serve youth who fit the Level I characteristics, but Level II clients will have assessment and admission priority.

D. Youth Recovery House

Youth appropriate for this service include: Those youth ages 13 through 17 who have completed residential chemical dependency treatment and who cannot immediately live with their legal guardians, parents, foster parents, or relatives, or other out-of-home placement. Youth ages 18, 19, or 20 may be served with clinical appropriateness for youth treatment as determined by a CDP. Youth from both Level I and Level II programs may be served in Recovery House Programs. DBHR currently has four recovery houses available for youth completing inpatient treatment.

Recovery House Programs provide adequate structure and supervision, continued treatment emphasis on recovery and abstinence from alcohol and other drugs, and improvement of living skills, including education and employment skills. The programs also provide access to community support systems, and youth participation in age-appropriate activities. The Recovery House Program is an extension of and transition from residential treatment.

E. Secure Treatment

Some Level I and Level II facilities provide interior/exterior security systems to reduce potential for youth running away. Contact Ruth Leonard at (360) 725-3742 for more information.

HOW TO REFER YOUTH TO TREATMENT

Each DBHR-contracted youth provider is responsible for determining a youth's clinical and financial eligibility for treatment at that contracted facility. Those youth who have already been determined to meet Title XIX (Medicaid) and/or have medical coupons will be eligible for DBHR-contracted outpatient and residential services. Income eligibility information may be accessed through the youth provider (*also see section on Early Periodic Screening Diagnosis and Treatment [EPSDT] on Page 10 of this booklet*). Other family resources may be used in combination with DBHR funds if appropriately determined, such as insurance or private pay.

For specific assessment and financial eligibility guidelines for pregnant or postpartum youth, see section titled *Pregnant And Postpartum Adolescents* on **Page 11** of this booklet.

Generally, it is best to refer a youth to an outpatient facility for the initial assessment, although residential facilities will provide assessments for DBHR-eligible youth without cost. The outpatient counselor can ensure that youth who are referred to residential services are referred back to the local outpatient program for continuing care support. Residential facilities will make every attempt to refer youth back to local outpatient services.

Although many youth reluctantly agree to enter treatment, there has been a small percentage of extremely resistant, defiant, runaway, non-offender youth whose parents have not been able to get them into treatment.

With enactment of the **At-Risk Runaway Youth Act**, known as the "**Becca Bill**," state legislators focused attention on a parent's right to provide for the protection of and to establish guidelines for their runaway, out-of-control youth. The "Becca Bill" gives parents additional options for accessing needed services. In support of this legislation, DBHR assists parents of youth with an At-Risk Youth (ARY) petition and those who are being admitted under the Involuntary Treatment Act (ITA). The ARY petition originates with the parent's local office of the DCFS, where a Family Reconciliation Services caseworker will assist the parent in filing the petition with Juvenile Court. *The ARY petition may be a helpful tool if all other avenues to get the youth into treatment have failed.*

Youth who may be experiencing immediate and life threatening consequences of chemical dependency, and who meet the incapacity criteria described in RCW 70.96A.140, may require involuntary commitment. The County Designated Chemical Dependency Specialist initiates the ITA commitment after an investigation and evaluation of specific facts alleging that a youth is incapacitated as a result of chemical dependency (see Appendix I in the DBHR "Greenbook").

BECCA UPDATE

In the 1998 Legislative Session, Substitute Senate Bill 6208 was passed into law. The bill did not change the current laws regarding consent for outpatient and inpatient treatment, although they re-titled them as "voluntary" treatment processes (listed in section "Age of Consent" in this Guide). **The law added new procedures for that which is referred to as "parent-initiated" outpatient and inpatient treatment.**

"Parent initiated" treatment allows a parent to bring a minor child to an outpatient or inpatient treatment provider to have the child assessed for admission, *without the child's consent*. The DBHR At-Risk/Runaway Youth Coordinator will review minors admitted to inpatient programs "without their consent" as to whether they meet "medical necessity" for inpatient treatment.

The new definition of "medical necessity" refers to inpatient care that will "alleviate a chemical dependency, or prevent the worsening of chemical dependency conditions that endanger life, or cause suffering or pain." Minor youth also have the right to petition the court for review of their continued stay in treatment. This and other safeguards will support the treatment of minors who are medically in need of treatment, but who refuse to consent or "volunteer" to be admitted.

In order to assist parents and treatment providers with the intent of all the Becca legislation, DBHR has defined "Becca-type" youth as those who have applied for treatment after going through any of the following processes:

- Parent-initiated admission of a non-consenting youth.
- Youth with At-Risk Youth (ARY) or Child In Need of Services (CHINS) petitions.
- Youth under an Involuntary Treatment Act (ITA) order pursuant to 70.96A.140.
- Youth referred after having been admitted to a DBHR-contracted Youth Detox/Crisis Stabilization bed.
- Youth applying for admission as a "Self-Consent," whose parents are unwilling or unable to provide, consent, and who meet the definition of a CHINS youth.
- Native American youth referred by a tribal court with any of the above legal designations.

The DBHR At-Risk/Runaway Youth Coordinator will continue to assist providers and parents with the prioritization of “Becca-type” referrals to treatment.

For more information about any of the “Becca” legislation, including copies of “*DBHR Implementation Guide for Substitute Senate Bill 6208*” **and to access treatment services, call Ruth Leonard at DBHR, (360) 725-3742.**

For Further Information about Youth Treatment Resources Including Assessment, Contact:

- Your local County Alcohol and Drug Coordinator
- Your DBHR Regional Administrator
- The TeenLine at (206) 722-4222 or Toll Free at 1-877-345-8336 (Washington only).
- Tina Burrell, DBHR Youth Treatment Systems Manager, at (360) 725-3796
- Ruth Leonard, DBHR At-Risk/Runaway Youth Treatment Manager, at (360) 725-3742.

AGE OF CONSENT FOR YOUTH TREATMENT PROGRAMS

Parental authorization is required for **any** treatment of a minor ***under age 13***.

- ***Outpatient chemical dependency treatment.*** Any person 13 years of age or older may give consent for counseling, care, treatment, or rehabilitation by a treatment program or by any person. Outpatient programs providing treatment to minors 13 years of age or older shall provide notice of the minor’s request for treatment to the minor’s parents within seven days **if** the minor signs a written consent authorizing the disclosure, **or** the treatment program director determines that the minor lacks capacity to make a rational choice regarding consent disclosure.
- ***Residential chemical dependency treatment (includes detoxification services).*** Parental consent is required for anyone **under the age of 18**, except that ***inpatient*** programs can now admit youth without a parental consent if the youth **meets the definition** of a Child in Need of Services. These youth should only be admitted if the youth has been living outside of the family home and the parents are unavailable, unable, or unwilling to provide consent to treatment. Admitting a self-consenting youth is a determination made by the program to which the youth applies, based on information obtained by the program, and the program must document efforts to locate and engage the parents in the treatment process.

If legal custody is held by DSHS, the DSHS caseworker must be contacted to consent to residential chemical dependency treatment.

FAMILY PARTICIPATION

Family participation is encouraged and strongly recommended. A definition of family includes birth, adoptive, foster, stepparent, and marital relationships.

CHILD CARE FOR CHILDREN WITH ADOLESCENT PARENTS IN TREATMENT

Childcare can be provided when youth that are parents participate in treatment. Part-time childcare is available while the parent is in outpatient treatment; 24-hour care may be available when a parent

is in residential treatment. For more information, contact Sue Green, DBHR Family Services Manager, at (360) 725-3732.

“If you want us to change the world someday, we at least have to live long enough to grow up!” shouts the child.

EARLY PERIODIC SCREENING, DIAGNOSIS, AND TREATMENT

This is a Title XIX, Medicaid-funded preventative health care program for children and youth up to age 21. Washington State calls its Early Periodic Screening Diagnostic and Treatment (EPSDT) Program “Healthy Kids.” In addition to providing for routine health concerns, any needed treatment identified in the EPSDT exam must be provided. For Medicaid youth who are substance-abusing, treatment must be provided if a health care practitioner through the EPSDT/Healthy Kids program identifies the need.

To assure that youth making application for services receive the full benefit of the EPSDT/Healthy Kids program, DBHR-funded youth contractors shall screen each applicant and make referrals as follows:

- a. All youth shall be screened for financial eligibility and referred to the local DSHS Economic and Medical Field Services Office (EMFS), formerly known as the Community Services Office (CSO), for Medicaid/Title XIX eligibility determination if the financial screen so warrants.
- b. Contracted programs shall refer Title XIX eligible youth that have not previously received an EPSDT/Healthy Kids health screen to an EPSDT/Healthy Kids primary health care provider for such services.

MEDICAL COUPONS FOR DBHR-FUNDED YOUTH IN RESIDENTIAL TREATMENT

When possible, youth who are referred to residential treatment, who do not currently have any medical coupons, should be assisted in attaining them **prior** to entering treatment. If coupons for medical assistance are not obtained prior to entering treatment, youth can be assisted by treatment staff upon admission to complete a form that can be mailed to the local DSHS, EMFS office. **To provide the most comprehensive medical and health services for DBHR-funded youth in treatment, contact the local EPSDT screener in your area (see EPSDT section).**

TRANSPORTATION ASSISTANCE/FAMILY HARDSHIP PROGRAM

A program intended to assist families of youth who are clients in DBHR-funded, residential chemical dependency treatment programs, and youth detoxification services. The program will assist families with travel and lodging costs to enable them to fully participate in the family treatment program. Eligibility is based on those families at the lowest income level with the least amount of resources, and who are required to travel more than 50 miles one way to attend treatment activities. Priority is given for travel that is clinically required. Lodging, when required, is also reimbursable. *DBHR reimburses residential providers who, in turn, directly reimburse families. Funds are also available to **outpatient** county-funded youth agencies. Contact the DBHR Regional Administrator for billing and other information.*

PREGNANT AND POSTPARTUM ADOLESCENTS

These youth are eligible for all substance abuse treatment services available for the adolescent population in general, as well as some specialized services for pregnant women. Pregnant adolescents who might require detoxification and medical stabilization services are assessed through county Alcoholism and Drug Addiction Treatment and Support Act (ADATSA) Assessment Centers. Adolescents who require detoxification and medical stabilization services must be determined financially eligible through the local DSHS, EMFS office.

Pregnant adolescents can receive detoxification and medical stabilization in a hospital-based intensive inpatient treatment program. There are presently a number of hospital-based intensive inpatient treatment programs across the state with a program for pregnant women. Some of these programs have specific services for pregnant adolescents. See the following Appendix listings, in DBHR's Directory titled: *DBHR-Funded Youth Residential Chemical Dependency Treatment Services (Appendix K)*, *ADATSA Assessment Centers (Appendix G)*, *DBHR Certified Hospitals Providing Intensive Inpatient Care for Chemical Using Pregnant Women (Appendix F)*; *DBHR-Contracted Residential Services for Women and Children (Appendix E)*; and *DBHR-Contracted Housing Support Services For Pregnant and Postpartum Women (Appendix D)*. Or go to the web site for more details: <http://www1.dshs.wa.gov/DBHR/services/certification/GB.shtml>

For more information, contact Sue Green, Family Services Manager, at DBHR, at (360) 725-3732.

.....
"As of today I have 106 days clean. I'm doing very good and feel the best I ever have in 6 years. Thank you for helping me find recovery and myself. I'm so grateful for you guys. You are awesome! Also, to the girls, even though they probably don't know me. Just say it's from the 1st graduate! Love always, E. P.S. I have finished my GED tests and am going to start community college.

-Note from a pregnant recovery house patient to the inpatient staff member.

DBHR-FUNDED YOUTH RESIDENTIAL
CHEMICAL DEPENDENCY TREATMENT/DETOX SERVICES
(Revised 9/12/2008)

DBHR-funded youth treatment and detox beds are open to youth regardless of county of residence. It is recommended that services be used closest to adolescent's home, when possible. See page 3 for definitions of treatment levels, services. See further program description information in certified treatment program listings in the DBHR Directory of Services.

"Before I realized that I needed help I was living in a hotel using every day and did hardly go outside except to go sell drugs for one of my friends or to go pick up some drugs from the connection's and to go shoplifting. While I was doing these things I was acting like I enjoyed myself but deep down inside I was completely miserable and hated life. I was slowly climbing the scale of self-destruction and became very sick. I wanted to die and so I tried to kill myself and I ended up in detox and they sent me here or they tried to anyway because when I found out what this place was really like I packed up and left and hitchhiked to Wenatchee stayed at my grandma for a couple days then tried to hitchhike to California but I got drunk and turned myself in. I made an agreement to go to treatment if they did not send me to jail because I had like 6 or 7 probation violations and then I got an outstanding warrant for leaving the city while on probation and leaving with a court date still standing and so I came here."

"Today I feel like a million dollars I am happy to be alive and I look pretty good. I'm gaining weight. I can run more than half a city block without dying and I have 5 or 6 days until I'll be completely clean of any drug whatsoever in my body. I'm excited for life. I want to get out and go to school and graduate with my class, and become a respectable citizen get a good job and be really helpful to my family when they need me, and not running away from my problems. I feel like I can go back out to the real world without a huge head and not push the people who love me away. Since I've been here I've dropped my ego so far down that I don't think that could ever pick it back up to where it was when I first got here. I've learned that there is life after drugs and I really hope to stay sober when I get out."

Sincerely: James

See Pages 3, 4 and 5 definitions of treatment levels and services.

See further program description information in the *DBHR "Greenbook,"* certified treatment program listing under each county.

For youth treatment at DBHR-certified private agencies that do not receive public funding, refer to the *DBHR Directory* and find "YOUTH" under TREATMENT FOCUS of each listed agency.

Income Eligibility Guidelines
For State-Funded Youth Treatment
Division of Behavioral Health and Recovery

FAMILY SIZE	MONTHLY INCOME	ANNUAL INCOME
1	\$ 2,311	\$ 27,732
2	\$ 3,022	\$ 36,265
3	\$ 3,733	\$ 44,798
4	\$ 4,444	\$ 53,330
5	\$ 5,155	\$ 61,864
6	\$ 5,866	\$ 7,0397
7	\$ 6,000	\$ 71,997
8	\$ 6,133	\$ 73,597
9	\$ 6,266	\$ 75,197
10	\$ 6,400	\$ 76,797
Each Additional Member Add \$133		
80% of State Median Income Based on calendar year 2004 State Median Income		

Comment [dj1]: I wonder if you should include the other options the we talked about with RoseMary.

NOTE: These income levels qualify families for **full** DBHR funding; *partial DBHR funding may be available for residential treatment for families with incomes above these levels.*

"Hey I'm going to really miss all of you. You all have brought me along way believe it or not I just want to thank you guys for having the heart to be willing to help teens out like us. No matter how much hell ive put you guys through ill always remember you all – and always have you staff in my heart and love you guys for being here for me and helping me out. I use to hate you guys so much until I stopped to think you guys taught me how to respect people, myself, & that I don't need drugs to live through life. Thanks so much to all of you for putting your time to us love always." Phil

-Written to a staff member by a recovery house graduate.

CHILDREN

Seldom Remember ***What We Say,***
Often Remember ***What We Do,***
Always remember ***How We Make Them Feel.***
